Revision Information

Revision Date	Updated Contents
2012-11-01	Initial Version
2013-04-01	Version 2 Following additions/changes were made. <ul style="list-style-type: none"> • Corrected command path error at Windows version deploy/undeploy time • Deleted the item since portlet initialization after tenant environment setup became unnecessary.
2014-01-01	Version 3 Following additions/changes were made. <ul style="list-style-type: none"> • Added [Update/Patch Application] • Added [Editing Configuration File (setting items maintenance by the Update)]
2014-04-01	Version 4 Following additions/changes were made. <ul style="list-style-type: none"> • Improved the table of contents structure (deleted the contents that overlap with intra-mart Accel Platform).

Introduction

Document Purpose

intra-mart Accel Collaboration is the module that operates on intra-mart Accel Platform.
 Setup contents related to intra-mart Accel Collaboration are described in this document.
 Please refer to [**intra-mart Accel Platform Setup Guide**] for the basic setting contents.

Setup Guide

VERSION 4 2014-04-01

Prerequisites

System requirements described in release note should be met.
 Please refer to [**Release Note**]-[**System Requirements**] for details.

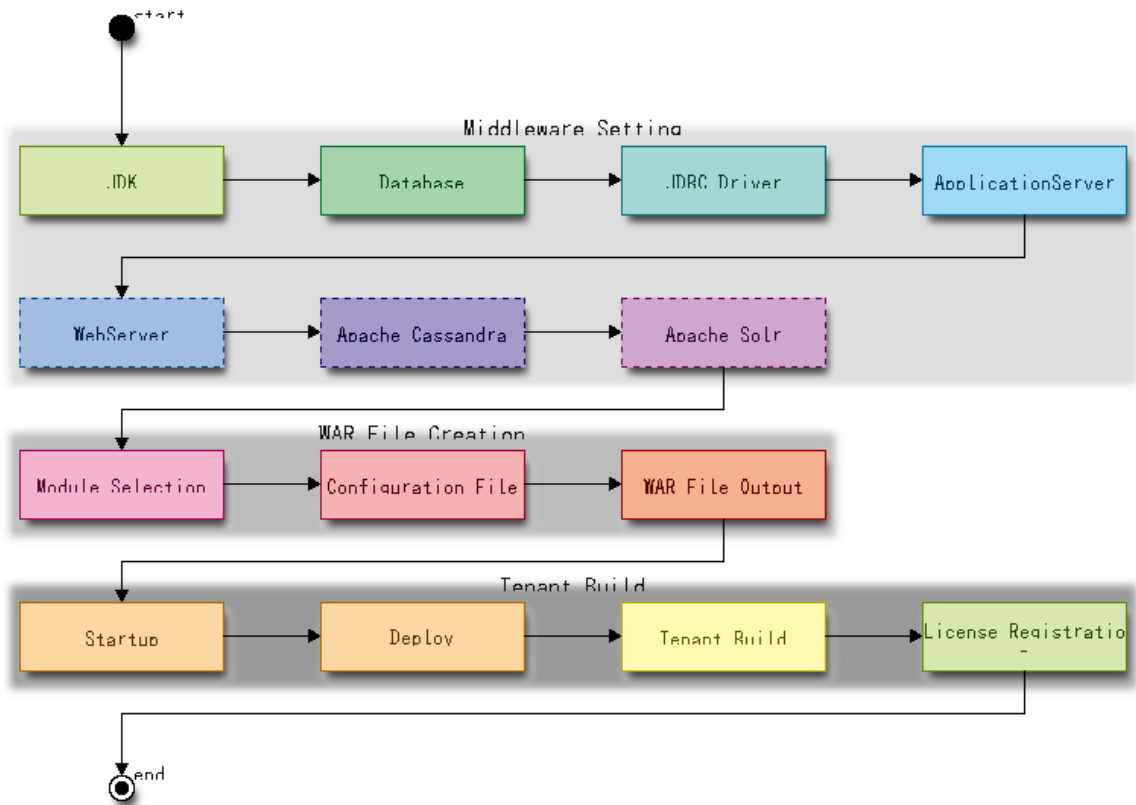

Target Readers

Following users are the target readers of this document.

- Users who do the setup of this product

Setup Flow

Setup flow is shown below.

Name	Description
start	
JDK	JDK
Database	Database
JDBC Driver	JDBC Driver
ApplicationServer	Web Application Server
WebServer	Web Server
Apache Cassandra	Apache Cassandra
Apache Solr	Apache Solr
Module Selection	Project Creation and Module Selection
Configuration File	Platform Configuration File - Various Configuration Files of intra-mart Accel Collaboration
WAR File Output	WAR File Output
Startup	Web Application Server Start and Stop
Deploy	WAR File Deploy
Tenant Build	Tenant Environment Setup
License Registration	License Registration
end	

Note

Legend

Various Configuration Files of intra-mart Accel Collaboration

After selecting intra-mart Accel Collaboration module from [**intra-mart Accel Platform Setup Guide**]-[**"Add Application" in "Project Creation and Module Selection"**], configuration file to use intra-mart Accel Collaboration should be edited if necessary.

Please refer to [**intra-mart Accel Collaboration Configuration File Reference**] for the configuration file of intra-mart Accel Collaboration.

Note

In order to edit the configuration file of intra-mart Accel Collaboration on IM-Juggling,

1. Double-click on <(project name)/juggling.im> file.
2. Click [Configuration File] tab.
3. Select the subject configuration file and click [Output] on the right.
4. Double-click on the file displayed on the tree inside the [ProjectNavigator] and edit it.

Remarks

About Settings in WebSphere Application Server V8

1. In order to do the linkage of schedule function with Google, it is necessary to set the signer certificate.
If this setting has not been made, [SSL HANDSHAKE FAILURE:xxxxxxx] is output in WebSphere Application Server log and google linkage cannot be performed.
- Please refer to the WebSphere Application Server guide to be used for the setting information.
Setting method on WebSphere Application Server 8.5 is described below.

Please follow SSL certificate and key control > key store and certificate > NodeDefaultTrustStore from the security menu of management console, click signer certificate in the addition property field, and display the signer certificate screen.

Then, please click [Get from Port] button and display the Get Screen, obtain signer information of the following contents, and set the signer certificate by clicking the Apply button.

<General Property>

Items	Descriptions
Host	www.google.com
Port	443
Another Name	Enter arbitrary name

- Latest module can be applied by using IM-Juggling.
Please refer to [[intra-mart Accel Platform Setup Guide](#)]-[[Apply Update Patch](#)] for detail.
